INDIAN LEADER BROKEN ARROW TRIBE PASSES

(By Associated Press)
TULSA, Okla., Jan. 20.—Another of the famous old Indian leaders who shaped the destiny of the red men in the early territorial days in Oklahoma has passed. In the recent death of David M. Hodge, 79 years old, last "king" of the Creek Indian nation, Oklahoma lost a most interesting character. He died here recently.

He was prominent in the affairs of his tribe since 1866, he ranked first among Creek statesmen, and although he never received the high honor in the power of the tribe, that of the principal chiefship, he was for years the chief adviser of the chiefs. His advice was sought by the successors of tribal heads and on repeated occasions he was named by the house of warriors and the house of kings—senate and house of representatives of his tribe—as the delegate to the "great white house" in Washington.

Hodge was made a junior officer in the forces of Albert Pike, discoverer of Pike's Peak, and was assigned to the army from Texas early in the Civil war. As the result of a battle with Union forces on Thanksgiving day, 1861, in which the army of the north, although possessing superior numbers, was almost annihilated, Hodge was given the rank of colonel and when the war ended he was in command of a regiment.

He was born in Muskogee, Oklahoma, his father being a Pennsylvania German and his mother a full blood Creek.

ENDORSE WORK OF SECRETARY POST

(By Associated Press)
WASHINGTON, D. C., Jan. 20.—Defense of the policy of the department of labor in dealing with radical aliens and complete endorsement of the work of Assistant Secretary Post in carrying out that policy, were made by Secretary Wilson in a statement today, replying to an attack on Mr. Post by the executive committee of the American Legion.

"Louis F. Post is one of the truest Americans I ever came in contact with," said Secretary Wilson's statement. "He is a thorough believer in democracy. He has no sympathy with any alien or American who believes in, advocates or teaches the use of force to overthrow the government of the United States. He has, however, profound belief in and reverence for the constitution of the United States, including that part which provides for its own amendment. He has, therefore, faithfully carried out instructions given by me as secretary of labor, concerning deportation cases."

REDUCTION BILL OF SEN. BORAH GETS THE O. K.

(By Associated Press)
WASHINGTON, D. C., Jan. 20.—Senator Borah's resolution proposing negotiations for a reduction of naval building by the United States, Great Britain and Japan, was reported favorably by the senate foreign relations committee. In lieu of the original proposal that negotiations should look to a reduction of 50 per cent in the figure of building for five years, the committee proposed that the negotiations provide for such reductions as can be agreed upon.

No record vote was taken on the Borah resolution, but that offered by Walsh of Montana, proposing that the United States have an American representative participate with the disarmament commission of the league of nations, was defeated 8 to 3 on a straight party vote.

1920 WAS GREAT YEAR FOR CORN

(By Associated Press)
WASHINGTON, D. C., Jan. 20.—The year 1920 was the greatest corn year in the history of the country, according to the records of the department of agriculture. Besides growing a record crop of 3,232,367,000 bushels, the farmers established a new record for average yield per acre of 39.9 bushels, the second time in history that the country's average yield went past 30 bushels.

The area planted to corn last year was 104,601,000 acres, which was smaller than the area planted in eight other years heretofore and 1,400,000 acres smaller than the area which produced the previous record crop of 3,124,746,000 bushels in 1912. Last year's crop was the third to exceed 3,000,000,000 bushels.

Iowa, the country's greatest corn producing state, made an average of 46 bushels to the acre for the first time in its history. The highest average yield of any state was that of Vermont with 47 bushels. Maine in 1919 had the highest average yield with 60 bushels. In the 10 years previous to that year the highest average acre-yield has been made by one of the New England states. Connecticut had highest yield in six of the 10 years, Massachusetts in two, New Hampshire in one and Vermont and Massachusetts tying in one.

CLAIM AGREEMENT MARINE COMPANY NOT TO INJURE ENGLAND'S TRADE

(By Associated Press)
WASHINGTON, D. C., Jan. 20.—Charges that the International Mercantile Marine company, an American company now controlling operation of approximately 40 vessels leased from the shipping board, is bound by an agreement entered into with the British government in 1901 to pursue "no policy injurious to the interests of the British merchant marine or British trade," were made by Senator Jones of Washington, author of the merchant marine act.

Portions of the text of the alleged agreement, entered into for a period of 20 years, were read by Senator Jones in an address before the annual convention of the National Merchant Marine association, in which he made sweeping charges of attempts by British interests supported, he said, by certain American interests to destroy the American merchant marine. To support his charges, Jones said an agent of the shipping board in New York city, who formerly was an employee of the International Mercantile Marine, opposed the establishment of an American shipping line between New York and England on the ground that it would "injure the business of British lines from New York."

P. A. S. Franklin, president of the company, asked why the man was Jones and Jones said he thought the name was Mr. Andrews. "We have never had a man by that name," declared Franklin, who then asked for further information as to the senator's charges. Jones asked to be excused, saying he was compelled to return to the senate for the regular session. "It is manifestly unjust," Franklin said, "for members of the senate of the United States to make such charges against the International Mercantile Marine. The company is American. None but Americans are on the board of directors. Ninety per cent of its stock is held by Americans."

SEMINOLE TRIBE GOES TO MEXICO

(By Associated Press)
WEEVOKA, Okla., Jan. 20.—At a conference of Seminole Indians held here recently a decision was reached whereby many Seminole Indians now living in Seminole county will move to Mexico next summer to live upon a reservation allotted to them in 1859 by the Mexican government if claims to the land can be established.

Louis F. Brown, chief of the Seminoles and son of former Governor J. F. Brown, with a delegation of 14 Seminole leaders, have left for Mexico City to confer with President Obregon and ask his decision on the claim.

Chief Brown is in possession of a copper medal upon which the original treaty was made to the tribe, granting the reservation to the Indians, which he will take with him to offer as proof of the grant. The only question that is uncertain in the minds of the Seminole leaders is whether the new Mexican regime will recognize the treaties of the old rulers.

HORSE SHOES IS REGULAR GAME IN FLORIDA

(By Associated Press)
ST. PETERSBURG, Fla., Jan. 19.—Horseshoe golf, as the sport of pitching horseshoes has come to be popularly known, thrives in Florida, which always has been the mecca of the enthusiasts of the game in winter. Its supporters are looking forward to the national championship matches to be held here beginning on Washington's birthday, February 22. Champions, ex-champions and would-be champions at present are busy practicing and two open or more courts are kept running here from morning till night. The championship matches will attract crack pitchers from all parts of the country.

The horseshoe pitchers have developed the game to a high degree. The equipment of a first-class park includes a lodge or club-house for storing the horseshoes, a small hand laundry to wash and dry towels for use of the players during the progress of the matches, hydrants of running water for use of the players to wash their hands after handling the horseshoes which sink deep into the soft earth about the pegs, a rake to keep the earth smooth about the pegs during the matches, and a small blacksmith shop to keep the shoes and pegs in best-class condition as the game is tough on them.

HIGH GRADE ORE FROM BUCKHORN

E. O. Dougherty, who with Frank Corr, have secured a lease on the Buckhorn property, owned by H. A. Geisendorfer and associates of New York city, reports that a shipment of five tons of high-grade ore is being made to the MacNamara mill in this city. The property is located about 65 miles northeast of Tonopah, a mile above the Wilson ranch at Harley Creek. Dougherty stated that the mine was being developed rapidly and that he expected shipments would be made regularly from now on. The ore just shipped was taken from the drift run from the 160-foot level, and is of a free milling grade.

Considerable water was encountered in the bottom of the shaft and at the 160 point, which will necessitate the installation of a pumping plant.

The district is highly mineralized and it is thought that the coming spring will see an influx of prospectors locating in the district.
